

W5-S2 PRACTICE

CSS GRID LAYOUT

- At the end of this practice, you should be able to...
 - ✓ Identify the best **CSS grid approach** in different use cases
 - ✓ From mockups to CSS grid layout

How to work?

- ✓ Download the start code from the LMS
- ✓ Open the folder in VS Code

How to submit?

- ✓ Push your final code on your GitHub repository
- ✓ Then attach the GitHub path to the MS Team assignment and turn it in

Are you lost?

You can read the following documentation to be ready for this practice:

- ✓ Guide WC3 School
- ✓ Read our amazing book!
- ✓ Learn CSS Grid in 20 minutes!
- ✓ Check the Grid handout!

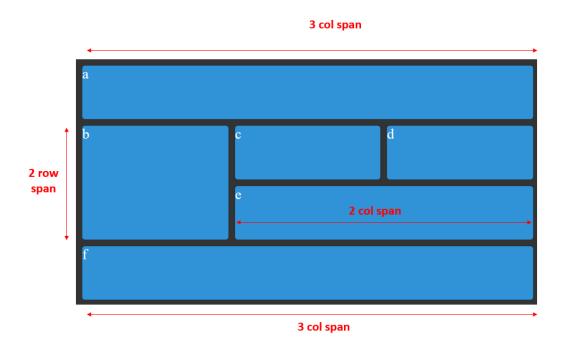

EXERCISE 1: The Basics!

Start code is provided for this exercise!

Using grid layout, build the layout pictured below.

We want a gap of 20px between each item (horizontally and vertically)

Are you lost?

TIP 1 - Here are the CSS properties involved in this exercise:

- grid-template-columns
- grid-template-rows
- grid-column
- grid-row
- display
- gap

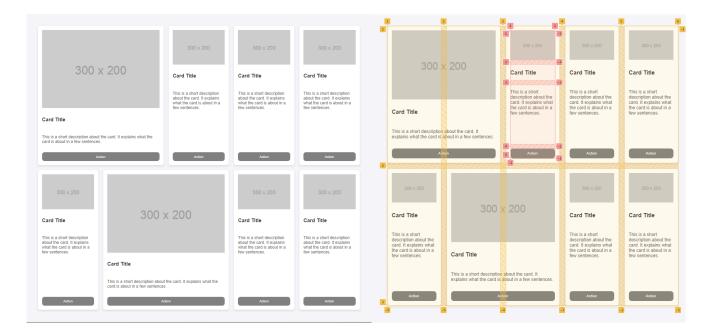

EXERCISE 2: Nested Grids!

Start code is provided for this exercise!

Using 2 grid layouts, build the layout pictured below.

- 1 grid to layout the card container
- 1 grid to layout the card

Notes

- Some cards span on 2 columns (class span2)
- Buttons should be vertically align with other button cards

EXERCISE 3: Responsiveness with grid layout

Start code is provided for this exercise!

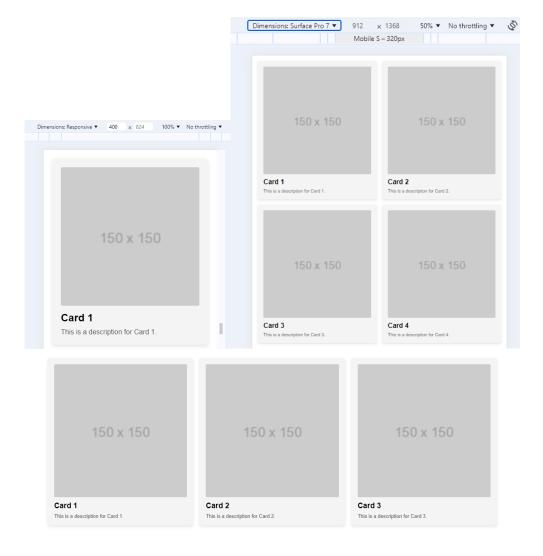

We want to add a bit of responsiveness to our page.

What is responsiveness and how to implement it with grid layout? Check out this link! https://travishorn.com/responsive-grid-in-2-minutes-with-css-grid-layout-4842a41420fe

The layout should display a single-column card on small screens (mobile) and a multi-column card layout on larger screens (tablet/desktop).

Phone (by default)
Tablets (> 601px):
Extra-large screens (> 1024px):
3 columns of cards

TODO: Add the needed media queries to change the grid layout, according to the device

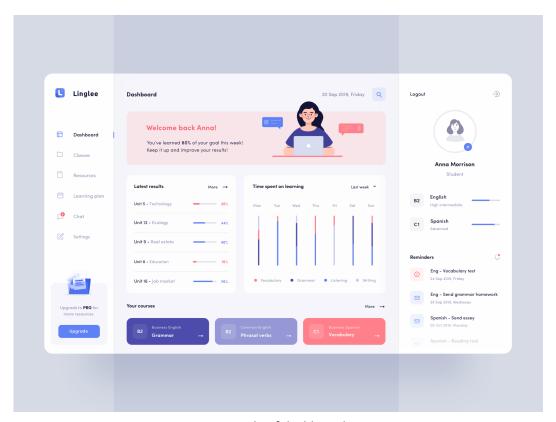

EXERCISE 4

Create a responsive **dashboard layout** using either **CSS Flexbox or CSS Grid**. The dashboard should be visually appealing and functional, adapting to various screen sizes.

This is a freestyle exercise, so you can express your creativity!!!

Note: we will ask you to explain your CSS strategy during the next review session. Be prepared to explain it.

Example of dashboard
